Kind People Care for All of God's Creatures!

Junior Farmer Nature & Craft Workshop

Plant a Wildflower Garden

Plant Kindness • Grow Joy • Share Love

What Are Wildflowers?

Wildflowers are beautiful flowers that grow in nature. They provide food and homes for bees, butterflies, birds, and many other animals. Wildflowers help make our world a brighter, healthier place!

Why Plant Wildflowers?

- Provide food for bees, butterflies, and birds
- Create homes for wildlife
- Make our environment healthier
- Add beauty to our world
- Help the earth
- Show gratitude for God's creation!

Things You Might See!

Junior Farmer Tips!

- [x] Be kind and gentle with all living things.
- [x] Choose a sunny spot.
- [x] Prepare the soil.
- [x] Scatter the seeds and lightly cover them.
- [x] Water gently and keep the soil moist until the seeds start to grow.
- [x] Be patient — it can take a few weeks for flowers to grow.
- [x] Watch, observe, and enjoy!
- [x] Thank God for the beautiful world He made!

Let's Make a Difference!

Even a small patch of wildflowers can help bees, buttertflies, birds, and many other creatures. When we plant wildflowers, we are caring for God's creation and helping make the world a brighter, happier place for everyone — people, animals, and plants too!

Small Seeds Grow Big Joy!

Junior Farmer Nature & Craft Workshop

Plant a Wildflower Garden

Let's Get Planting!

What You Will Need:

Wildflower Seeds

Small Shovel (or trowel)

Watering Can (or hose)

Soil (or garden soil)

Rake (optional)

Garden Gloves (optional)

Steps to Plant Your Wildflower Garden:

1 Choose a Sunny Spot

Find a place that gets at least 6 hours of sunlight each day.

2 Prepare the Soil

Loosen the soil with a shovel or rake. Remove large rocks and weeds.

3 Scatter the Seeds

Sprinkle the wildflower seeds evenly over the soil. You don't need to plant them deep.

4 Lightly Cover the Seeds

Gently press the seeds into the soil or cover them with a thin layer of soil.

5 Water Gently

Use a gentle spray so the seeds don't wash away. Keep the soil moist until the seeds start to grow.

6 Be Patient and Watch!

It can take a few weeks for the seeds to sprout. Keep watering and watch for new green sprouts!

Helpful Growing Tips!

- [x] Plant in the spring or early fall.
- [x] Choose a sunny spot.
- [x] Use a mix of wildflower seeds.
- [x] Keep the soil moist (but not soggy).
- [x] Be patient — it can take a few weeks to see sprouts.
- [x] Enjoy watching the flowers grow!
- [x] Let the flowers bloom all summer.
- [x] They will come back year after year!
- [x] Be kind and care for all living things!

Wildflowers Help:

Bees Find Food

Butterflies Have a Home

Birds Find Seeds
